

A2
CMT

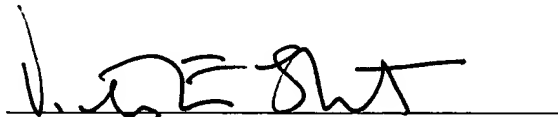

70. (New) The method of claim 59 or claim 60 wherein the refractory carrier has a plurality of parallel exhaust stream flow passages extending therethrough and defined by passage walls on which the catalytic material is coated, and the catalytic material further comprises dispersed palladium carried thereon in the amount of from about 0.1 to 200 g/ft³.

B

REMARKS

This preliminary amendment is made to present claims to subject matter which was divided and/or canceled from parent applications of the above-captioned continuation application.

Respectfully submitted,

Victor E. Libert
